

min=20, max=37, n=15

Use 10s as the stem, and 1s as the leaf, but two leaves per stem

2		330
2*		879
3		3420300
3*		75

2		033
2*		879
3		0002334
3*		57

There are not many numbers. Describing a distribution with few numbers is not easy. But we would say it is roughly, left-skewed, unimodal without outliers.
